

# CASE STUDY

## Driving Manufacturing Excellence

A mid-sized uniform manufacturer based in Abu Dhabi, specializing in both standard and customized uniform solutions. The company had previously implemented two different ERP systems that failed to meet its needs — one lacked customization for measurements and visual catalogs, while the other was overly complex, making it difficult for employees to use effectively.

### OBJECTIVES

#### Optimize Production Planning

To align resources, workforce, and raw materials efficiently for timely order fulfillment.

#### Improve Inventory & Supply Chain Control

To maintain accurate stock levels, reduce wastage, and ensure seamless supplier coordination.

#### Ensure Ease of Adoption & Usage

Provide a simple, user-friendly ERP that employees can quickly adapt to without complexity.

### APPROACH

- Implemented Cybrix ERP tailored for uniform manufacturing
- Integrated production, procurement, and finance into a single system
- Provided real-time dashboards for order tracking, inventory, and production
- Automated reporting and compliance

### RESULT

#### Increased Productivity

Production efficiency improved by 40%, enabling up to 3x more custom orders through better scheduling and resource use.

#### Reduced Material Wastage

Fabric wastage decreased by 25% with accurate stock tracking and demand forecasting.

#### Improved Order Fulfillment

Real-time tracking of orders and inventory shortened lead times and ensured timely delivery to clients.

#### Ease of Adoption

Employees quickly adapted to Cybrix ERP's user-friendly interface, reducing training time and increasing overall system usage.

### CONCLUSION

By adopting Cybrix ERP, the uniform manufacturer streamlined its operations, improved order fulfillment, and gained end-to-end control over production and inventory. The system's customization and ease of use allowed employees to adapt quickly, helping the company deliver quality uniforms efficiently and remain competitive in the market.
